

Xoomworks
SAP Ariba
experts help
you deliver
the cloud's full
potential.

At Xoomworks we are experienced in all aspects of SAP Ariba Products

- P2P
- Supplier Management and Risk
- Contract compliance
- SAP S/4 Hana Integration
- Guided Buying
- Sourcing
- Ariba Network
- Contract Management
- Supplier Enablement
- Spot Buy
- Invoicing

In addition to Ariba expertise, we also provide senior transformation consulting, and near-shore operational support services.

About Xoomworks

If you are moving to the cloud or are already enabled, Xoomworks will help simplify your digital cloud journey and support you as you evaluate, implement and optimise your SAP Ariba cloud platform. We provide a user friendly, cost effective and constantly evolving suite of tools to help deliver a full **Source to Pay** process.

Not yet implemented or getting the best from Guided Buying?

With our knowledge of Guided Buying we will ensure that your configuration will deliver optimum efficiency for your organisation. We look at the whole Source to Pay process to work in harmony with your Guided Buying implementation whilst incorporating more automation for many of your manual tasks.

Need to do more on Supplier Management and Risk?

If you are a SAP SPM customer and want to move to Supplier Lifecycle Performance, we can help with your configuration and migration. Also, if you are looking to incorporate Supplier Risk into your processes, our experts are well positioned to deliver this effectively.

Looking for Innovative Solutions for you Procurement function?

Already established on the SAP Ariba cloud platform but looking for more? Now with Open APIs available we can help increase your technology footprint across your procurement function. We provide innovative solutions to extend the SAP Ariba modules - our latest is a plug-in focused on increasing automation for supplier payments.

System Support, Administration & Training

We offer a wide range of competitive system support and administration models across the spectrum of SAP Ariba products. We also offer business support functions. For example, running your tendering processes (Incl. Auctions), Contract Management, Supplier Enablement projects to name a few.

Digital Procurement using SAP Ariba

How does your SAP Ariba cloud solution fit into your Digital Procurement strategy? If you need, our team of experts can deliver any of the following:

- We develop apps using SAP's open APIs to help fulfill and deliver the complete procurement process.
- Run an assessment of your current situation, technology and business processes using our one day digital workshop.
- Develop a digital procurement target operating model and create a technology and change road map to help deliver it.

Focused on delivery

We take a collaborative approach to working with you to deliver the best solution for your organisation.

Focused on Innovation

Our development teams are fully enabled to exploit the SAP Ariba open API's, extending the cloud modules further across Procurement.

XoomCloud[®]

XoomCloud is our cloud-based, rapid deployment methodology that we tailor and use on all our projects. It is an in-depth playbook that ensures consistency in delivery, provides greater governance, and makes sure all the best ways of working with our partners are always at our fingertips.

XoomTune[®]

XoomTune is our optimisation dashboard and methodology that we build into each project. Following go-live, it helps ensure clients are delivering against their business case and provides recommendations on continuous improvement.

Giving you the confidence with our SAP Ariba cloud capability

We have played key roles in developing the right strategy for clients such as Sky, AXA and IAG. We understand the challenges and options available and can guide you to the best solution strategy. Once you have the right strategy, having more experience than most, Xoomworks has delivered over 50 successful cloud projects and can support you with your cloud implementation.

- Our XoomCloud methodology improves governance and efficiency of implementation specifically for cloud projects.
- Over 17 years of experience implementing SAP Ariba modules from Sourcing through contract management, P2P and analytics.
- Strong focus on strategy and change management – delivering procurement outcomes not just technical go-lives.
- Helping both suppliers and buyers to get the most from the Ariba Network (over 200,000 suppliers enabled)
- Provide service desk and release management through our experienced Operational Procurement Services team
- From our team of over 200 employees, many have 20+ years' experience in implementing and running SAP Ariba products.
- Innovative products to help optimise your platform and get more from your SAP Ariba implementation.

About Xoomworks

Xoomworks is a niche consultancy and outsourcing company that specialises in procurement. Based in UK and Europe, we are a team comprised of technical, business and behavioural consultants, and senior procurement experts. Our complete procurement proposition addresses both the mechanics and behaviours of procurement that drive the greatest value for organisations.
